29 Electrons are accelerated and then directed into the uniform electric field between two parallel plates in a vacuum.

What best describes the shape of the path followed by the electrons in the field?

- A a downwards curve along a line that is part of a circle
- B a downwards curve along a line that is **not** part of a circle
- C an upwards curve along a line that is part of a circle
- **D** an upwards curve along a line that is **not** part of a circle
- **30** A charged particle is in the electric field between two horizontal metal plates connected to a source of constant potential difference, as shown. There is a force *F* on the particle due to the electric field.

The separation of the plates is doubled.

What will be the new force on the particle?

- A $\frac{F}{4}$
- $\mathbf{B} = \frac{F}{2}$
- C F
- **D** 2*F*
