**27** The diagram shows the paths of two charged particles, X and Y, during their passage between a pair of oppositely charged metal plates, P and Q.

The plates are charged such that the electric field between them is directed from Q to P.

Which charges on X and Y will produce the observed paths?

	Х	Υ
Α	1	ı
В	_	+
С	+	_
D	+	+

28 There is a potential difference between a pair of parallel plates.

Which values of potential difference and separation of the plates will produce an electric field strength of the greatest value?

	potential difference	separation
Α	2V	2 <i>d</i>
В	2 <i>V</i>	<u>d</u> 2
С	<u>V</u> 2	2d
D	<u>V</u> 2	<u>d</u> 2
