(a)	Find the value of the constant <i>a</i> .	
(b)	Hence find the coefficient of x^3 in the expansion of $(3+ax)^6(1-2x)$.	
(b)	Hence find the coefficient of x^3 in the expansion of $(3+ax)^6(1-2x)$.	
(b)	Hence find the coefficient of x^3 in the expansion of $(3+ax)^6(1-2x)$.	
(b)	Hence find the coefficient of x^3 in the expansion of $(3+ax)^6(1-2x)$.	
(b)	Hence find the coefficient of x^3 in the expansion of $(3+ax)^6(1-2x)$.	
(b)	Hence find the coefficient of x^3 in the expansion of $(3+ax)^6(1-2x)$.	
(b)
