28 A teacher sets up the apparatus shown to demonstrate a double-slit interference pattern on a screen.

Which change to the apparatus will increase the fringe spacing?

- **A** decrease the distance *p*
- **B** decrease the distance q
- **C** decrease the distance *r*
- **D** decrease the wavelength of the light
- 29 Light of a single unknown wavelength and blue light of a single wavelength are both incident normally on a diffraction grating. Two diffraction patterns are produced, one for each wavelength of light.

The third-order maximum for the blue light occurs at the same angle as the second-order maximum for the light of unknown wavelength. The wavelength of the blue light is 480 nm.

What is the unknown wavelength?

- **A** 320 nm
- **B** 720 nm
- **C** 960 nm
- **D** 1440 nm
- **30** What is the electric field strength in a region where a proton accelerates at 2.00 m s⁻² due to the field?
 - **A** $11.4 \,\mathrm{pV}\,\mathrm{m}^{-1}$
- **B** $5.22 \,\mathrm{nV}\,\mathrm{m}^{-1}$
- \mathbf{C} 10.4 nV m⁻¹
- **D** $20.9 \,\mathrm{nV}\,\mathrm{m}^{-1}$
