10 The table gives estimates of the price elasticities and cross elasticities of demand for bus and rail travel.

service	elasticity with respect to the price of:	
	bus travel	rail travel
bus travel	-0.37	+0.13
rail travel	+0.16	-0.43

What would be the change in the volume of rail travel resulting from a 1% increase in bus fares?

- A an increase of 0.16%
- **B** an increase of 0.43 %
- **C** a reduction of 0.13%
- **D** a reduction of 0.37 %
- 11 The diagram shows the demand and supply curves for a good.

The government fixed a maximum price of OP₁.

What would this have achieved?

- A the guarantee of supplies of OQ₂
- **B** the market equilibrium of quantity OQ
- C the need for a government subsidy of PP₁
- **D** the rationing of the product for consumers to OQ₁
