13 At sea level, atmospheric pressure is 100 kPa and the density of air is 1.3 kg m⁻³.

Assume that the density of air decreases linearly with height above sea level.

What is an estimate of the total height of the atmosphere based on this information?

- **A** 7.8 km
- **B** 16 km
- **C** 77 km
- **1**50 km

14 Trains supply coal to a power station. The table shows quantities describing the operation of the power station.

	symbol	unit
power station average output	P	W
number of trains per day	N	
mass of coal on a train	М	kg
energy from 1 kg of coal	E	J
number of seconds in one day	S	

Which expression gives the efficiency of the power station?

- A $\frac{PS}{NME}$
- $\mathbf{B} \quad \frac{PSN}{ME}$
- c NME
- D <u>NM</u> PSE

15 A piston in a gas supply pump has an area of 500 cm² and it moves a distance of 30 cm.

The pump moves the gas against a fixed pressure of 4000 Pa.

How much work is done by the piston?

- **A** 60 J
- **B** $6.0 \times 10^3 \, \text{J}$
- **C** $6.0 \times 10^5 \, \text{J}$
- **D** $6.0 \times 10^7 \, \text{J}$
