17 The table shows the results of a cost-benefit analysis into the building of a new runway at an airport.

	costs US\$m	benefits US\$m
private	100	125
external	25	20

Which statement about the new runway is correct?

- A The net external benefit is US\$5 million.
- **B** The net private benefit is US\$25 million.
- **C** The net social benefit is US\$105 million.
- **D** The net social benefit is US\$145 million.
- 18 In the diagram, the initial quantity traded was Q and the price was P.

The price then rose to P₁ and the quantity traded rose to Q₁.

Which combination of government policy measures could explain this change?

- A the removal of a maximum price and the imposition of an income tax on consumers
- **B** the removal of a maximum price and the removal of a subsidy to producers
- **C** the removal of a minimum price and the granting of a subsidy to producers
- **D** the removal of a minimum price and the imposition of an indirect tax on the product
