1 The steel required for the construction of a new car-assembly plant in a fully employed economy is obtained by increasing the output of the domestic steel industry.

What is the opportunity cost of producing the steel?

- A the alternative benefits forgone by diverting additional resources to steel manufacture
- **B** the alternative benefits forgone by increasing the capacity of the car industry
- **C** the alternative benefits that would have been obtained by putting the steel to other uses
- **D** zero, since there is no reduction in the steel supplied to other steel users
- 2 The diagram shows shifts in an economy's production possibility curve.

Which change could have come about as a result of an improvement in technology?

- A S to Y
- B T to S
- C W to T
- **D** W to Y
- **3** What is meant by the ceteris paribus assumption?
 - **A** an assumption that is not supported by the facts
 - **B** an assumption that consumers act rationally
 - **C** an assumption that two factors are in equilibrium
 - **D** an assumption that other factors are held constant
- 4 What is the outcome for consumers and workers as a result of increased division of labour?

	consumers	workers
Α	less choice of goods	wider range of skills
В	fewer mass-produced goods	wider variety of tasks
С	lower prices of goods	increased productivity
D	lower quality of goods	increased independence
