4	The gradient at any point $(x, y)$ on a curve is $\sqrt{1 + 2x}$ . The curve passes thro Find	ough the point (4, 11).
4	The gradient at any point $(x, y)$ on a curve is $\sqrt{1 + 2x}$ . The curve passes thro Find  (i) the equation of the curve,	rugh the point (4, 11).
4	Find	
4	Find  (i) the equation of the curve,	[4]
4	Find  (i) the equation of the curve,	[4]
4	Find  (i) the equation of the curve,	[4]
4	Find  (i) the equation of the curve,	[4]
4	Find  (i) the equation of the curve,	[4]
4	Find  (i) the equation of the curve,	[4]
4	Find  (i) the equation of the curve,	[4]
4	Find  (i) the equation of the curve,	[4]
4	Find  (i) the equation of the curve,	[4]
4	Find  (i) the equation of the curve,	[4]
