7 A stone is thrown upwards and follows a curved path.

Air resistance is negligible.

Why does the path have this shape?

- **A** The stone has a constant horizontal velocity and constant vertical acceleration.
- **B** The stone has a constant horizontal acceleration and constant vertical velocity.
- **C** The stone has a constant upward acceleration followed by a constant downward acceleration.
- **D** The stone has a constant upward velocity followed by a constant downward velocity.
- **8** Which graph represents the motion of a car that is travelling along a straight road with a speed that increases uniformly with time?
