16 A steam turbine is used to drive a generator. The input power to the turbine is $P_{\rm I}$ and the output power $P_{\rm O}$. The power loss in the turbine is $P_{\rm L}$, as shown below.

What is the efficiency of the turbine?

- $\mathbf{A} \quad \frac{P_{\mathsf{L}}}{P_{\mathsf{O}}}$
- $\mathbf{B} \quad \frac{P_{\mathrm{I}}}{P_{\mathrm{O}}}$
- $\mathbf{c} = \frac{P_{\mathsf{L}}}{P_{\mathsf{L}}}$
- $D = \frac{P_{\rm C}}{P_{\rm T}}$
