7 The market for mobile phones is initially in equilibrium at X. The government then imposes a sales tax.

What is the government's total tax revenue from this tax?

8 What is an example of the rationing function of the price mechanism?

Α

JKX

- A When the price of a product is falling, firms will allocate less resources to its production.
- **B** When the price of a product is falling, the government can set an effective minimum price.
- **C** When the price of a product is rising, firms will expand production of the product to make profits.
- **D** When the price of a product is rising, some consumers will no longer be able to buy it.
