**12** William buys radios for \$10 each and sells them for \$15 each.

His draft statement of financial position included a value of \$1500 for inventory.

His method of calculation of inventory was correct.

He then found that 12 radios could only be sold for \$8 each and 4 radios had been stolen.

By how much should William reduce his inventory valuation?

- **A** \$64
- **B** \$84
- **C** \$124
- **D** \$144

13 A sole trader has **not** kept a full set of double-entry records.
