21 The diagram shows the arrangement of atoms in a particular crystal.

Each atom is at the corner of a cube.

The mass of each atom is $3.5 \times 10^{-25} \, kg$. The density of the crystal is $9.2 \times 10^3 \, kg \, m^{-3}$.

What is the shortest distance between the centres of two adjacent atoms?

- **A** $3.8 \times 10^{-29} \, \text{m}$
- **B** 6.2×10^{-15} m
- $\boldsymbol{C} \quad 3.4 \times 10^{-10}\, m$
- **D** $3.0 \times 10^{-9} \, \text{m}$
- 22 The stress-strain graphs for loading and unloading four different materials are shown.

Which material exhibits purely elastic behaviour?
