9 A firm publishes and sells books. The diagram shows a shift in the firm's supply curve from S_1 to S_2 .

What would have caused this shift in the firm's supply curve?

- A a fall in the subsidies paid to book publishers
- **B** a fall in the price of paper
- **C** a rise in the real income of customers
- **D** a rise in the wages of the firm's workers
- **10** A product has a low price elasticity of supply.

What might explain this?

- A The product has a low opportunity cost.
- **B** The product has a perishable nature.
- **C** The product is classed as an inferior good.
- **D** The product is considered to be a necessity.
- 11 In the diagram, S₁ and D₁ are the initial supply and demand curves for tea and X is the original equilibrium. There is then a failure in the coffee harvest of a major coffee producer.

Which point would represent the equilibrium position in the tea market as a result of this failure?
