7 A cannon fires a cannonball with an initial speed v at an angle α to the horizontal.

- Which equation is correct for the maximum height *H* reached?

- **B** $H = \frac{g \sin \alpha}{2v}$ **C** $H = \frac{(v \sin \alpha)^2}{2g}$ **D** $H = \frac{g^2 \sin \alpha}{2v}$
- A ball strikes a horizontal surface with momentum p at an angle θ to the surface, as shown. 8

The ball rebounds with the same magnitude of momentum at an angle θ to the surface.

The ball is in contact with the surface for time *t*.

- What is the magnitude of the average resultant force acting on the ball during the collision?
- zero

- 9 A skydiver, who is falling vertically through the air, opens his parachute.

Which row describes the velocity of the skydiver immediately after he opens his parachute?

	direction of velocity	magnitude of velocity
Α	downwards	decreases
В	downwards	increases
С	upwards	decreases
D	upwards	increases
