4 The times taken, t seconds, by 1140 people to solve a puzzle are summarised in the table.

Time ( <i>t</i> seconds)	$0 \le t < 20$	20 ≤ <i>t</i> < 40	40 ≤ <i>t</i> < 60	60 ≤ <i>t</i> < 100	$100 \leqslant t < 140$
Number of people	320	280	220	220	100

(i) On the grid, draw a histogram to illustrate this information.

[4]

(ii)	Calculate an estimate of the mean of $t$ .	[2]
