)	Find the set of values of k for which the equation $8x^2 + kx + 2 = 0$ has no real roots.
)	Solve the equation $8\cos^2\theta - 10\cos\theta + 2 = 0$ for $0^\circ \le \theta \le 180^\circ$.
)	Solve the equation $8\cos^2\theta - 10\cos\theta + 2 = 0$ for $0^\circ \le \theta \le 180^\circ$.
)	Solve the equation $8\cos^2\theta - 10\cos\theta + 2 = 0$ for $0^\circ \le \theta \le 180^\circ$.
	Solve the equation $8\cos^2\theta - 10\cos\theta + 2 = 0$ for $0^\circ \le \theta \le 180^\circ$.
)	Solve the equation $8\cos^2\theta - 10\cos\theta + 2 = 0$ for $0^{\circ} \le \theta \le 180^{\circ}$.
