- 1 What is **not** a reasonable estimate of the physical property indicated?
 - $\mathbf{A} = 2 \times 10^3 \,\mathrm{W}$ for the power dissipated by the heating element of an electric kettle
 - **B** $4 \times 10^2 \,\mathrm{m}^3$ for the volume of water in a swimming pool
 - \mathbf{C} 5 × 10⁵ N s for the momentum of a lorry moving along a road
 - **D** 6×10^2 N for the weight of a fully grown racehorse
- 2 Which quantity could have units of $N m V^{-1}$?
 - A acceleration
 - **B** charge
 - **C** current
 - **D** resistance
- 3 An object is acted upon by two forces, 10 N in the vertical direction and 6 N at 40° to the vertical, as shown.

What is the resultant force acting on the object?
