2	(a)	Define	accel	leration

	[41

(b) A ball is kicked from horizontal ground towards the top of a vertical wall, as shown in Fig. 2.1.

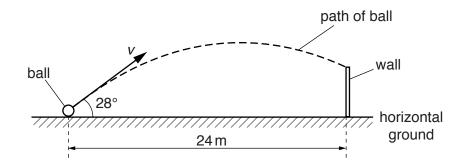

Fig. 2.1 (not to scale)

The horizontal distance between the initial position of the ball and the base of the wall is $24 \, \text{m}$. The ball is kicked with an initial velocity v at an angle of 28° to the horizontal. The ball hits the top of the wall after a time of $1.5 \, \text{s}$. Air resistance may be assumed to be negligible.

(i) Calculate the initial horizontal component $v_{\rm x}$ of the velocity of the ball.

$$v_{\rm X} =$$
 m s⁻¹ [1]

(ii) Show that the initial vertical component v_Y of the velocity of the ball is $8.5\,\mathrm{m\,s^{-1}}$.

[2]

(iii) Calculate the time taken for the ball to reach its maximum height above the ground.
