28 Monetary policy can be used to increase the level of business activity.

Which action illustrates this?

- A curbing consumption through controls on credit
- B lowering reserve requirements of banks to increase lending
- c reducing government spending to achieve a budget surplus
- **D** stimulating company investments by increasing interest rates
- 29 When will a country's balance of payments current account deficit be reduced?
 - A when it lowers tariffs on its imports
 - **B** when it raises its rate of income tax
 - **C** when it removes export subsidies
 - **D** when it revalues its currency
- **30** The diagram shows four possible aggregate supply curves and an equilibrium point X. A government employs deflationary fiscal policy in order to reduce the rate of inflation in its economy. This shifts aggregate demand to AD₂.

With which AS curve would this policy be most effective?
